Does Not Rot or Corrode

Surfaces Protected from
Scratches by a Plastic Peel
Off Film on Both Sides

A 4' x 8' Sheet of
AlumaCorr is
Strong and
Sturdy but only
Weighs 20 lbs.

.013 Aluminum
Laminated on Both
Sides for Strength
and Panel Rigidity

Use Your Standard Sign
Paints or Vinyl Graphics
Immediately, No Prep
Time Needed!

NUDO
AlumaCorr™
Aluminum/Plastic Corrugated Sign Panel

Introducing Another Proven Quality Sign Panel from Nudo Products, Inc.

We've given you vinyl laminated White-Wood, and aluminum laminated Nu-Alum. Next in our quality constructed line of sign panels is AlumaCorr — an aluminum clad panel with a corrugated plastic core. A panel that's lightweight, making installation easier, yet sturdy enough to stand up to the most inclement weather. AlumaCorr will not rot or corrode, it is unaffected by water or snow — a perfect panel for outdoor applications.

Quality Construction

Our professionally crafted product is made of a corrugated copolymer polypropylene core with a laminated .013 aluminum surface on both sides. It's baked enamel polyester wax-free coating is ready for your sign paint, inks or vinyl graphics, no prep time needed! AlumaCorr has a durable fade-resistant surface making vinyl relettering simple—change it again and again with minimal or no ghosting at all. It's glossy, smooth surface is protected in shipping by a plastic peel-off film on both sides.

Easy Fabrication

AlumaCorr, like our other panels, cuts easily using standard woodcutting tools. You can even route and bend AlumaCorr panels, making them the ideal panels for electrical signs and push through letters. No edge sealing is necessary. Choose our hassle-free edge caps when a finished edge is preferred.

Sizes and Colors

AlumaCorr panels are available in 4' x 8' or 4' x 10' (standard sizes) or special orders of 60" widths. Call for our selection of available colors, or you can choose the epoxy primed surface for repainting in your special custom color.

Ten Year Warranty

AlumaCorr Sign Panels are covered by a limited 10 year warranty. We carry a lifetime warranty on the aluminum bonded to the corrugated core. If for any reason this bond fails, we will replace the panel. AlumaCorr panels are recognized under the Component Recognition Program of Underwriters Laboratories Inc. • 

Nudo Products understand that features alone won't amount to anything if our customers are left unsatisfied. So we continue to make reliability and dedication our commitment to you. We strive to lesson your daily challenges through innovation. Try our newest innovation AlumaCorr Sign Panels. We think you'll agree, they will decrease your challenges through increased productivity.

Directions

AlumaCorr panels should be conditioned prior to painting with a multi-solvent cleaner (Gon, wax & grease remover, Pre-Kleeno, or Prep-Sol). Wipe with cleaner, then wipe dry. Use only quality sign paint such as lettering enamel or Bulletin paint. Always test panels prior to producing a finished product. **No preparations are needed** when applying vinyl letters or graphics other than wiping the panel clean. Never use Lacquer Thinner as a cleaning agent.

AlumaCorr panels are cut on four sides and ready for immediate use. If a finished look is preferred, use our hassle-free caps. Simply miter cut or notch and wrap corners. Run a bead of our sealant down inside of capping. Place capping on panel and wipe off any excess sealant.

Product No. *	Thickness & Description	Sizes	Wt.
SNIC200-8-D-PF2	.200" (5 mm) Corr/Fluted Alum (2-sides)	4' x 8', 10'	18
